

Maintenance Worker

Job Types: Full Time

Salary: From \$20.00 per hour | *Pay commensurate with experience.*

Job Summary

We are looking for a Maintenance Person to join our team and provide general maintenance services to our facility. The successful candidate will be responsible for performing repairs, conducting inspections, and ensuring that all safety protocols are followed. The ideal candidate should have experience in general maintenance, possess strong problem-solving skills, and be able to work independently with minimal supervision.

Responsibilities:

- Perform preventative maintenance on building systems and equipment.
- Perform minor repairs and troubleshooting of building systems and equipment.
- Inspect and test building systems and equipment to ensure proper operation.
- Maintain records of maintenance activities and document any repairs or replacements made.
- Ensure compliance with safety regulations.
- Use basic power tools, welding tools, forklift, articulating booms, etc to complete assigned projects.
- Read blueprints and do layout work/sketches.
- Use plasma cutter for various projects.
- Timely analysis and repair of all breakdowns in shop using basic troubleshooting skills.
- Demonstrate a high level of communication, cooperation and teamwork with production operators to maintain and repair shop equipment
- Properly prioritize issues and take personal accountability to make sure all repairs fit the core value of "Excellence".

- Prioritize safety above all other job duties by having a safety-first approach at all times.
- Report any safety issues, observations, opportunities to your teams and follow up.
- Provides general and detailed maintenance, including patching, painting, hardware repairs and other repair/replacement work as required.
- Performs routine facility and equipment maintenance.
- Knowledge of high voltage (480 volt, 3 phase)
- Work on welders, brake press and other machinery
- Work on air tools
